

Marlborough Lines

Energising Marlborough's Future

Marlborough Lines Limited Delivery Price Schedule from 1 April 2024

This schedule sets out Marlborough Lines Limited's (MLL's) line delivery prices to apply from 1 April 2024.

These prices cover the costs of MLL operating and maintaining the network which distributes electricity to approximately 27,000 consumers. MLL's costs include recovery of charges from Transpower, the owner and operator of New Zealand's electricity transmission grid which MLL's network is connected to.

MLL's price changes from 1 April 2024 include:

- A small increase for most consumer groups to cover increases in MLL's costs (note that increases are generally to the fixed price components).
- The introduction of optional time of use price categories for Residential and General consumers.
- Increases for remote consumers relative to non-remote consumers. Connections in remote areas cost significantly more to maintain a supply to, higher prices reflect and signal the cost of supplying these connections.
- Increases in the fixed daily charge for Residential Low Fixed Charge consumers from 45c/day to 60c/day consistent with the Electricity (Low Fixed Charge Tariff Option for Domestic Consumers) Regulations 2004.

For an 'average' residential consumer (DL, DS15) who consumes 8,000kWh per annum, the post-discount price increase will be approximately 13c per day (5.4%).

Any consumer who owns (or purchases) an Electric Vehicle (EV) may like to connect their EV charging point to MLL's controllable tariff (12 or 16 in this price schedule). MLL charges approximately 3c less per kWh of energy under the controllable tariff. For further information, please contact MLL or your local electrician.

MLL passes its prices on to consumers' electricity retailers who may in turn rebundle these prices. This may mean that you will not see MLL's prices reflected in the same manner on your monthly invoice from 1 April 2024.

If you are concerned whether you are on the price plan best suited to your circumstances, please contact your electricity retailer.

Further information on MLL's line delivery pricing, including guidance on eligibility criteria for price plans and a copy of the delivery price schedule, can be found under the pricing section of MLL's website at: www.marlboroughlines.co.nz

Notes:

1. The Delivery Price is the price MLL invoices electricity retailers (Traders) trading on MLL's network and includes both distribution and transmission components.
2. This Price Schedule should be read in conjunction with our Delivery Price Guidelines, Pricing Methodology, published Loss Factors, and Remote Areas map (available on our website).
3. Discount payments will be made to eligible consumers approximately in May 2025, based on prices and consumption between 1 April 2024 and 31 March 2025, providing that there is no legislative or regulatory changes that would adversely affect the provision and/or receipt of discount payments.
4. Temporary supplies and consumers located in areas designated remote are ineligible for the discount payment. Other eligibility criteria may apply.
